PROFESSIONAL SUMMARY

Enthusiastic and detail-oriented Frontend Developer with 3 years of experience building responsive, high-performance web applications using React.js, Redux, JavaScript (ES6+), Tailwind CSS, and TypeScript. Proficient in REST API integration, UI/UX collaboration, and component-based development. Adept at Agile/Scrum methodology and delivering scalable, reusable, and maintainable code. Proven ability to implement secure login systems, improve performance metrics, and drive clean UI designs. Currently seeking a challenging role in a dynamic tech environment to create impactful digital products.

TECHNICAL SKILLS

- Languages: JavaScript, TypeScript, HTML5, CSS3
- API & Backend: Python,Fastapi,Strawberry
- Frameworks/Libraries: React.js, Redux (Thunks/Saga), React Native, Bootstrap.
- Testing & Dev Tools: Git, GitHub.
- Design Tools: Figma.
- Other: Agile/Scrum, Jira

EXPERIENCE

Frontend Developer
Inforios Private Limited | Aug 2022 – Present

- Developed and maintained responsive web applications using React.js, Redux, and Tailwind CSS.
- Collaborated with UI/UX designers to translate wireframes into functional frontends with pixel-perfect accuracy.
- Built reusable, maintainable components to streamline development and ensure design consistency.
- Integrated REST APIs using Axios and Fetch for secure and seamless backend communication.
- Participated in Agile sprints, contributing to sprint planning, stand-ups, and retrospectives.
- Diagnosed UI issues, fixed rendering bugs, and improved application performance by 20%.
- Applied Git for version control and code collaboration across the frontend team.

.

Project: Resilient Plus
Technologies: (React, TypeScript, Redux-Saga)
Responsibilities:

- Developed scalable and responsive UI components using React.js and TypeScript.
- Integrated secure login system using JWT authentication and multi-role access control.
- Embedded Metabase dashboards using iframe for business analytics.
- Improved performance by 20% by optimizing rendering and reducing DOM reflows.
- Followed Agile development practices, participated in sprint planning, standups, and retros.
- Used Redux-Saga for managing complex asynchronous actions and API calls..

Project: HR Management System

Technologies: React.js,Redux Thunks.

Responsibilities:

- Built reusable components for managing employees, attendance, and payroll modules.
- Created geo-location visualization using Cluster API for supplier mapping.
- Implemented secure, email-based invitation flow for supplier onboarding.
- Translated high-fidelity Figma designs into reusable React components, improving UI consistency and reducing design QA time by 25%.
- Ensured mobile responsiveness and cross-browser compatibility (99.8% success rate).

EDUCATION:

Bachelor of Engineering (B.E.) – Computer Engineering
Ponnaiyah Ramajayam Engineering College | 2016 – 2020
Graduation Percentage: 72%

CERTIFICATIONS

(Coursera)

- Front-End Web Development with React
- Server-Side Development with Node.js and MongoDB
- HTML, CSS, and JavaScript for Web Developers
- Agile with Atlassian Jira
- Version Control with Git
- Professional Skills for the Workplace
- Computer Hardware and Software
- Adaptability and Resiliency
